1 Biographical Note

A physicist by education, I received my PhD in Computer Science from the University of Liverpool, UK in 2003. From 2002 to 2007 I worked as a Research Fellow at the top ranked Universities of Liverpool and Southampton, UK. Since 2007 I work at the Universitat Autònoma de Barcelona, Spain, first as a “Beatriu de Pinós” fellow, then as a “Ramon y Cajal” senior fellow, and since March 2018 as contracted professor.

I develop my research at the Computer Vision Centre, where I **lead the Vision and Language research group**. I am **associate director** of the Centre since 2014.

My main research interests are computer vision and machine learning, and in particular robust reading systems, document image analysis, human-document interaction, and human perception modelling. I have produced >100 peer reviewed publications, including 22 in indexed journals and 8 book chapters that have received more than 2600 citations¹.

In 2013 I received the **IAPR/ICDAR Young Investigator Award** for “*innovative research in human perception-based document analysis*” as well as “*outstanding service to the ICDAR community in a variety of roles*”. This recognition is awarded by the International Association of Pattern Recognition, after an international nomination and evaluation process to one individual every two years.

In 2016, I received a **Google Research Award**, in the line of Machine Perception, for pursuing research in the line of modelling the interplay between visual and textual information in images.

I have been the **principal investigator** of various research projects, including a continuous stride of national research projects since I joined the Univ. Autònoma de Barcelona in Spain.

My research activity is **accredited by AQU**, the Catalan Agency for the Quality of the University System at the maximum level (“*Acreditació de Recerca*” U1445/11534680-113, “*Acreditació de Recerca Avançada*”: CT5JVYP7J) while I have also been positively evaluated by the **I3 program** in Spain.

I count with extensive **technology transfer experience**. In 2007 I set up with fellow-researchers the **spin-off company TruColour Ltd, UK**, specializing in perception-based colour calibration solutions. In 2019 I set up with colleagues the **spin-off company AllRead², Spain**, backed by the Mobile World Capital, specializing in the recognition of structured text in the wild. I have secured numerous **research** and **technology transfer contracts**. Technologies I have transferred are used daily in sectors such as banking (administrative documents classification for CaixaBank: thousands of images processed automatically per day) and utilities (automatic reading of consumption from gas meters for Naturgy: >10k images analysed per week, >2M images over the past two years).

A key driver in my professional activity is ensuring that research output creates real-life impact. In this line, I **conceived and led the creation of the “Library Living Lab” (L3)³**, converting a public library in Sant Cugat del Vallés, Barcelona, into an open, participatory innovation space. The project, aligned with European and regional innovation policies, is a collaboration between the public administration, research institutions, industry partners and citizens’ associations. L3 is an authentic implementation of the **quadruple helix innovation model** and a framework for social innovation in a real-world context. Under my leadership L3 became a member of the **European Network of Living Labs** in 2015 and was **nominated for the city awards** of Sant Cugat del Vallés in 2016.

I am the **chair** of the Technical Committee 11 (Reading Systems) of the International Association of Pattern Recognition (IAPR). TC11 coordinates the activities of the **>1,200 members strong** international research community in this area.

I am also a member of the **IAPR Education Committee**, the IEEE, while I have served in the IAPR Industry Liaison Committee and I have been a founding member and a member of the executive committee of the UK Chapter of the SPIE.

In 2018 I was invited by the Secretary of Telecommunications, Cybersecurity and Digital Society of the Generalitat de Catalunya to participate in a **high-level work group** to define the **Catalan Strategy on Artificial Intelligence**, under the name “Catalonia.AI”⁴.

I have served the international research community in several roles. I have been involved in the organisation of the main international events in my research field in various capacities. I serve on the **editorial board** of IPSJ Transactions on Computer Vision and Applications. In 2015 and 2019 I edited special issues on Robust Reading of the Int. Journal on Document Analysis Recognition (Springer) and of Pattern Recognition (Elsevier). I am an evaluator of research projects of various calls.

I have launched and run biannually since 2011 the **Robust Reading Competition** series⁵, that has been established as the **de-facto international benchmark** in my research domain, serving more than **12,000 registered researchers** from 128 countries and having received and evaluated more than **47,000 results submissions** to date (at the rate of 30 per day). The Robust Reading Competition has built bridges between the document image analysis area and the wider computer vision research field and has created significant impact in the international research community.

I have 20 years' worth of **teaching experience** at different undergraduate and postgraduate levels. My teaching activity is **accredited by AQU** (“*Professor Lector*” U1443/8155058-76). Apart from day-to-day teaching activities, I have led the organization of the Winter School on Eye-Tracking Methodologies (2007), I actively participated in the launch of the **Doctoral Consortium** of the Int. Conf. on Document Analysis and Recognition in 2011 and the **IAPR TC10/11 Summer School** series in 2016 and I am overlooking their continuous organization as the chair of IAPR TC11.

I have developed a considerable part of my career abroad through numerous contracts and research stays in foreign institutions. My experience abroad includes contracts in venues of high-esteem, such as the School of Electronics and Computer Science of the Univ. of Southampton, UK, a **Marie Curie visiting researcher** stay at ITESOFT, France and numerous other research stays.

9 Awards

IAPR/ICDAR Young Investigator Award (2013)

For “*innovative research in human perception-based document analysis*” as well as “*outstanding service to the ICDAR community in a variety of roles.*”

The IAPR / ICDAR Young Investigator Award is given by the International Association of Pattern Recognition, following an international nomination and evaluation process to one individual every two years.

Google Research Award (2016)

Received an unrestricted gift award of \$37,245 USD, jointly with Dr A.B. Bagdanov (University of Florence), in the line of *Machine Perception*, for pursuing research in the line of modelling the interplay between visual and textual information in images.

The Google Faculty Research Awards Program “aims to recognize and support world-class, permanent faculty pursuing cutting-edge research in areas of mutual interest”.
